

# TRANSITION THROUGH INNOVATION

Accelerating the development of green innovation

Non exhaustive list

**Higher performance  
insulants**

**More renewables with  
Furtive wind turbines**

**Free & green heating  
using smart data centers**

**Low GHG fire  
protection**

**Green mobility  
with e-bikes**

**Higher performance solar  
panels that repel dust**

**Optimized airplane fuel consumption**

**Carbon absorption by  
planting trees**

**Fuel saving thanks to  
optimized train driving**

**Reducing gas flaring while  
generating power**

**Improved wind power**

**Optimized home  
monitoring**

**Higher torque,  
zero emissions**

**Reduced traffic: saving  
time while being green**

**Greener mobility  
using natural gas**

**Using a pipeline  
instead of trains**

**Zero emission mobility  
using hydrogen cars**

**Fuel savings thanks to  
lighter and stronger steel**
